RE: Evaluation of PTI Productivity

The following is an evaluation of the Press Trust of India (PTI) newscast for the period 1-25 August.

During the evaluation period, nine PTI items were filed, five textually and four as briefs. Of the nine, seven were on an international topic and involved India, while the remaining two treated domestic issues.

Six of the items filed from PTI were never covered by ISI or Delhi radio. These are:

- India, USSR Reach Agreement on Machine Building Plants
- FAO Food Conference (brief)
- Supreme Soviet's Barkauskas Satisfied With Indo-Soviet Ties
- Work on Missile Station (brief)
- Encephalitis in West Bengal (brief)
- Soviet Shipping Experts (brief)

It is noteworthy that a report on Vajpayee's plan to visit the Soviet Union was carried and filed from PTI on 19 August but not reported by Delhi radio until 24 August.

A PTI report on Desai inaugurating the ESCAP trade ministers meeting in New Delhi was filed, goose-egged to a longer ISI report naming the conference participants. However, a Delhi radio report covering the same material as the PTI report as well as a longer, 4-minute report were both held. Thus, PTI did not provide any material not available from other sources.

Desai's remarks on nuclear fuel talks with the United Kingdom, filed from PTI, were carried by ISI but held.

At the current subscription rate of \$750 per month, we have paid approximately \$83 per item during the 1-25 August trial. Since three of the items which were filed from PTI were available from other sources, it is doubtful that the need for the remaining six justifies the high cost.

We might add that August was by no means a slow news month in India. Among other developments were further legal moves in the case against Mrs. Gandhi, charges of corruption against the son of Prime Minister Desai, continuing fallout from the internal political squabbling in the ruling Janata party, and extensive traveling by the Indian external affairs minister. All of these, as well as other important developments, were well covered by Delhi radio or ISI.
